

Anne Tamminen has made several public and site-specific works. The range of her public works extends from small interventions in cityscape or public indoor spaces to large-scale entities, such as a pop up -project at the prestigious [Helsinki Music Centre](#) and the series of permanent, large and translucent photographs installed in several sites in the [Verkatehdas Arts and Congress Center](#) in Hämeenlinna. Spatiality and a careful consideration of site-specific matters is present in all of her work.
